

WORKERS' COMPENSATION PHYSICIAN PANEL

If you are injured while performing work for the City of Sevierville you are entitled to payment of your medical expenses for your work-related injury or illness.

Before any medical expenses will be covered, you must promptly inform your supervisor or department head of your work-related injury and of your need for medical attention.

Tennessee Workers' Compensation Law provides for you to select your treating physician from a panel of physicians given to you by the City of Sevierville. The panel of medical providers is listed below. It is important for you to give notice of your injury and medical need to your supervisor or department head before seeking medical attention.

In case of **true medical emergency**, seek medical attention from the nearest emergency room. Do not use the emergency room except for emergencies and after hours. Give notice of injury to your supervisor or department head at the earliest reasonable time. A panel of treating physicians will be offered to you after emergency medical care is provided.

If you choose to seek medical care and treatment from a physician who is not provided by the City of Sevierville, then your medical expenses will be your own responsibility.

This is the City of Sevierville's current panel of physicians and may change in the future. A current listing of physicians will be provided when you give notice of injury if the panel is changed.
